Recommended Specifications

Toilet shall be Willoughby Model No.

BETW-1490-FM-FA-____ (select from table above).

Fixture shall be fabricated from heavy gauge, type 304 stainless steel. The construction shall be all-welded. Fixture exterior shall have a gloss white powder coat enamel finish. Toilet bowl interior shall have a sanitary bead blast stainless steel finish.

Standard toilet shall include: elongated toilet bowl with integral contoured seat, integral crevice-free self-draining flushing rim with positive afterfill and fully enclosed 2 1/2" O.D. trap which shall maintain a minimum 3 1/2" seal and pass a 2 1/8" ball. Toilet shall be blow-out type which requires 25 psi minimum flushing pressure. Hinged toilet seat shall have open front with cover and be rated for 1200 lbs. weight capacity. Toilet seat hinges shall be stainless steel, seat and cover shall be white in color.

Fixture (less hinged seat) shall withstand loadings up to 2,000 lbs. with no measurable deflection and loadings up to 5,000 lbs. with no permanent damage.

Anchoring shall be from the front thru two (2) 12"x12" removable access panels. The fixture is provided with three (3) 7/8" wall carrier mounting holes and one (1) floor mounted Z-Clip mounting bracket. Wall and floor anchoring hardware by others. The fixture is floor mounted and is designed to mate with a three (3) bolt blow-out carrier.

On back to back fixture installations, do not use standard cross type waste fittings: cross flow may result due to blowout jet action. Use sanitary or offset type waste fittings.
