$ Water-saving device

WILLOUGHBY WUFC-4000

Flush Controller

Economically control up to 4 toilets! Take control of inmate water usage. Willoughby's electronic flush controller can limit the number of flushes per hour saving maintenance time, water, and money. This stand-alone, non-networked unit is field adjustable—no PC required!

Maximum Control
Each flush controller can restrict toilet flushing from 1 to 8 times per hour.

Restrict the Flow
Water and money going down the drain? Restrict the amount of water inmates can use with the turn of a knob.

Nuisance Flushing Eliminated
Our device can also restrict the number of flushes per hour and the amount of time between each flush for maximum control.

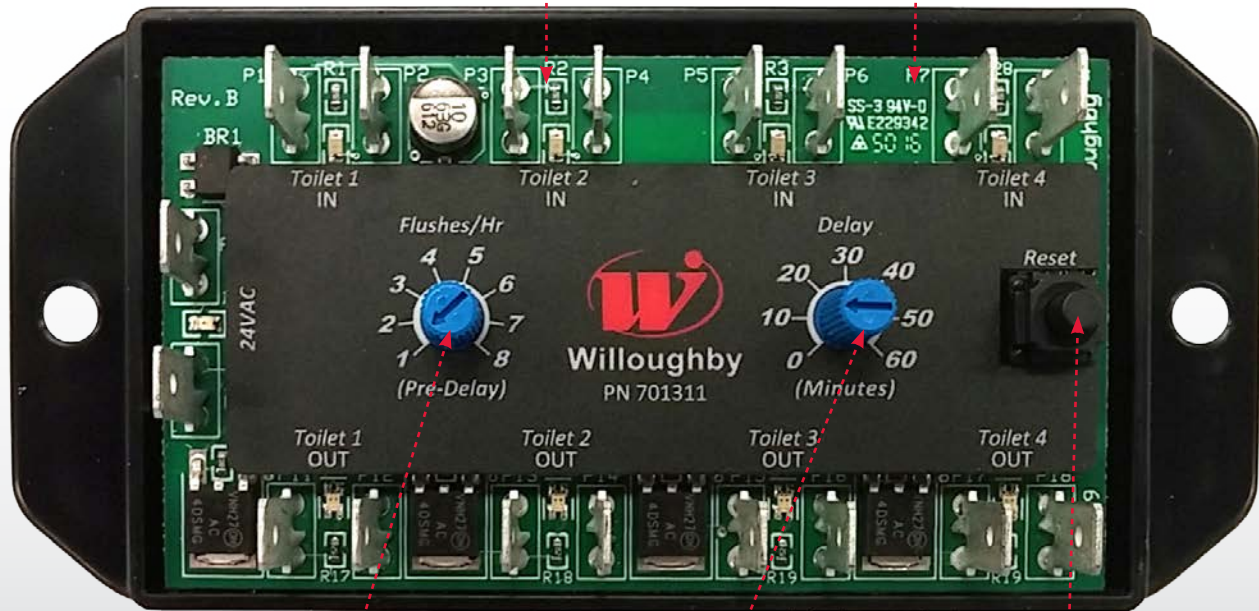

WILLOUGHBY

Flush control
• Each device can control 4 electronic flush valves.

LED lights
• Indicate that a time delay situation has occurred.

Restrict flushes per hour
• Choose between 1 and 8 flushes before lockout delay.

Preset reinitiate delay time
• After maximum number of flushes is reached, toilet won't flush until delay time has passed.

Reset
• Maintenance personnel can easily reset functionality from the chase.
